friends of the party implicated. Erie was heavy at the close and sold at 461, equal to 501 dividend on. The receipts continued to be about the same as in April het year. Certain parties continue to sell New-York Central, and it elected dull at 87. The decline of the last few days, after the announcement of the large earnings of March, has excited some remark. Panama improved i v cent. Western Shares were generally avy. Rock Island declined 1 & cent, Southern Michigan I * cent, Toledo } * cent, &c. For Nic-aragua 4} was bid. Illinois Central Bonds were in demand and better, closing at par. Eries of 1871 sold at 78, 1875 901, &c. In State Stocks the business was moderate and prices steady. At the close of the Second Board the whole market was very dull. The bear party appear still to have nearly all the nerve ervable, and the outside movement, which was mederately active early in the week, appears to have again subsided.

The Directors of the Bank of New-York have de-

sided to increase their capital stock from \$2,000,000 to 3,000,000. The business of the Clearing-House was \$23,127,009. The Cincinnati, Hamilton and Dayton Road has deelared a semi-annual dividend of 31 to cent, payable

to New-York stockholders on the 15th May. On call money is very abundant, and loans on current securities are made with greater case than for some sime past. Paper of first class is in demand at 8 ?

cent, and occasionally is passed at lower figures. The Washington (steamer to-morrow), will probably take \$100,000 in gold. The Circassian, from Portland, took \$56,000. The Empire City, for Havana Lo-day, took \$300,000 in doubloons. Mr. Trautwine, and the remainder of the Engineer Corps of the Interoceanic Honduras Railroad, sailed to-day for Omoa,

new equipage, &c. The entire debt of the Company, floating and funded, is \$103,489. Of the receipts, \$398,358 were for passengers and \$827,311 for freight.

The increase over last year is \$39,458 85. The expenses of working the Road, including interest and Zaxes, was 47 30-100 & cent on the income. The receipts of the Morris Canal Company for the week ending April 11 were \$4,885 82. At the same

time last year the canal had not carned anything. The contrast between the business of the Boston Board of Brokers and the New-York Board is very marked. At our Board it is not unusual to do a daily business of 25,000 to 30,000 shares stock, and \$100,000 to \$500,000 of railroad and State bonds. The average

business of the Boston Board is 500 to 1,000 shares daily. Yesterday the entire transactions added up 400 shares of various stocks, while during the past six days one house, members of the New-York Board, have bought and sold 40,000 shares of stock. The private letters by the steamer speak of the ad-

vance in interest by the Bank as having been taken to check speculation and to arrest measurably the drain of gold to the continent. The writers think the advance will not be permanent. A fair amount of orders have come for our Securities, mainly for Illinois Central. The advice of the increased capital of this Company was favorably received, and the market advanced, but was after depressed by the bears, who sold short on the expectation that their shorts could be filled in this market at a profit. The Circular of Messrs. Berenburg, Gossler & Co. of Hamburg says:

Berenburg, Gossler & Co. of Hamburg says:

"A restrictive measure on the part of the Bank of Hamburg about further loans on silver and gold coins and gold bars, called forth by the increasing drain of bar silver, has created a sort of panie in our money market, and discount has gradually advanced to 7 \$\psi\$ cent for best paper, with a corresponding decline of our principal exchanges, which close firm. The business in stocks and shares is almost paralyzed for the moment."

On the day following, the 1st April, the same gentlemen write a private letter, stating that money had become again easier, exchange lower on England, and the Bank of Hamburg had reduced its rate again to

The Domestic commission houses have not done the usual business of the season during the past week, as the jobbers are not actively engaged with the near-by rade. Payments from the West continue to be re ported very unsatisfactory, and the buyers of that section, being unwilling to meet their creditors here with empty hands, are buying in other cities. Cotton Yarns have continued to be well supported in price as a general thing, but with only a very moderate demand, though trade has revived a little within the last day or two. We give the following details of the state of the market for Cotton fabrics: Brown Sheetings and Shirtings have been in moderate request at Sic. for light; 9ic. for heavy; for export, 9ic. In Bleached Sheetings and Shirtings little has been done, and irregular makes continue to accumulate. Drills have sold to some extent, partly for export, and may be quoted firm at 9c. for Brown; Bleached 94c.; Blue 104c. Osnaburghs have been quiet, and rather depressed, but without quotable change in price. We quote but without quotable change in price. We quote Lowell No. 1 A, 30-inch, at 11 c. Denims were a little improved; prices of Columbian, Oxford and Pacific, 10 c.; Pearl River, 15 c.; York, 15 c.; Amosheag, 16c. Stripes and Ticks were taken about as received, though the business is only moderate, We Metal commands 27;422c, 6 mos; Inget Copper is in moderate

Quote Amockeag Ticks at 11] #18c. for the different widths and numbers. Cotton Duck was in fair de, mand at 22 w33c, for the different grades of Colt's. Printing Cloths fully sustained, at prices ranging from 41c. for 40x44, to 61c. for 68x72. Prints have been rather quiet, though some styles have been inquired for. All staple styles held firmly at 10 a 10 le. for first-class madders; 9 a 9 c. for second class; balf madders, 6 #8c. In Lawns there has been little movement, as the weather has been too chilly to call out a demand. Prices of seasonable goods on 1,400 cloths, range from 13@15c. Ginghams have been in moderate request at 11 212c. for the different makes. Mous de Lains are generally sold up. Challies quiet but firm, at 18 20c.

The absence of an active demand has created a depression in the market for domestic Woolens, which we are convinced is only temporary, as it does not arise from any over-stock of desirable goods. Cloths have been quite dull; the range for felts is \$2 and a trifle under; for cotton warps \$1 37; a \$2. Fancy Cassimeres, especially the less favorite makes and styles, have been little inquired for, and prices are very irregular for Spring goods. Messrs. Wilmerdings & Mount sold at auction on Tuesday about 3,000 pieces of coatings and fancy cassimeres, which went from 10 to 15 # cent under agents' prices. Buyers were numerous and spirited, and the prices obtained were not perhaps lower than could have been anticipated, as the goods, especially light coatings, were unseasonable, the majority of buyers having supplied themselves already with this kind of fabrics. Tweeds and Jeans were call. Satinets quiet, but pretty firm at prices ranging from 35 260c. Carpetings quiet, nothing doing except by auction. The Auburn goods were offered at auction on Wednesday, and went at comparatively low prices.

The importers have done very little business during the week, and the jobbers in fancy goods complain of an unusual duliness, though this is an old story with them. Their sales for the season have been very good. All staple articles are well supported in price, but fancy silks and goods of that description must be sacrificed by importers. The auction sales of the week have been large in amount, and the prices obtained for French goods were rather lower than those of previous sales. Cloths have been in little demand, but the views of holders are quite firm, in view of the rise in material on the other side. The same may be said of hosiery goods. Linens have been rather inactive. In China-silk fabrics we notice no increase in

demand, and no change in prices.

At Boston, Minnesota stock has advanced to 135. In regard to the recent discovery of copper at this mine, The Ontonagon Miner of March 21 says:

In regard to the recent discovery of copper at this mine, The Onionagon Miner of March 21 says:

Since our last publication we have been twice into the Minnesota Mine to look at this wonderful piece of copper. A few tuns have already been taken from it, and there are thirty men at work cutting it up. More parties will be put on soon. The lower end of the copper was raised by the powder from the rock in which it was inclosed, the upper end being very little disturbed. This leaves it inclining but very little from the horizontal, and in an excellent position for cutting to advantage. They are cutting in some ten places, two of which are already in to where the copper is five feet thick. Another is four feet and a quarter. Eighteen inches further will bring one of the cuts to where the copper is 74 feet thick. Its greatest thickness is between eight and nine feet, but the cuts driven in from the edges very soon reach the thickness of 3, 4, or 5 feet, and its average thickness will be from 31 to 4 feet. Its greatest length is 46 feet. Greatest width 18½ feet. We cannot think its average thickness to be less than three and a half feet. These dimensions give it a cubic content equal to about 2,000 feet, and this amount of pure copper would weigh 549 tuns. There is scarcely a possibility of its being any thing less than almost solid metal. If it is 91 per cent, and this is not a high estimate for such a mass, it contains about 500 tuns of pure copper, and will be worth, when prepared for the market, about \$300,000. This, we respectfully submit, is the largest mass of metal of any kind ever yet exhibited in a single piece upon this plane. But the great mass is a small part of the copper now in sight in its hemediate vicinity. About a hundred feet to the east a series of monster masses of enormous size are now being stripped and followed into the conglomerate. The disclosures of the last few days are immensely important. It is perfectly safe to say that there are at least two thousand tuns of copper in sight within a fe

which we have described.

The Louisville Journal of the 14th inst. says:

"The Louisville Journal of the 14th inst. says:

"The Kentucky Trust Company Bank case of Fennell vs. Sandford, which has attracted much attention of late, its results being of great importance to parties holding the notes or Stock of the Bank, was decided on Saturday against Fennell. Judge Moore of the Kenton County Circuit Court in Covingtongave judgment sustaining the mortgage made by B. F. Sandford to the Savings Bank of Cincinnati, and dismissing the attachment taken out by the Commissioner of the Kentucky Trust Company Bank. The full extent of this mortgage was \$150,000. This decision will greatly disturb the calculations of note and stockholders. It was confidently expected by parties interested in the Bank that the mortgage would be set aside, and the property be used in the assets of the Bank."

From the Paris Correspondent of Commercial Advertiser.

A painful sensation was produced among the American population of Paris, last Friday, by the announcement that the American banking house of Green & Co. had failed. This house, which for many years has done an immense business, and enjoyed the entire confidence of the public, was established by Mr. Wells of Boston thirty years ago. It afterwards fell into the hands of Mr. Green of Boston, and after his death the business was continued by the widow and the two sons-in-law who had been employed in the house, Messrs. Vanderbrack and Charles A. Green. The majority of Americans coming to Paris intrusted their money to this house, and no suspicion was felt of its insecurity until it was too late.

I have been told that Fould and Solar, and other large banking houses, have at times within the last two years refused the paper of Green & Co., but al-The Louisville Journal of the 14th inst. says:

the truth, I would give you this assertion under reserve.

The house of Green & Co., it appears, had unbounded confidence in M. Dutchi, (although I am told this is his second failure), and agreed to furnish him the funds in his enterprise on condition of receiving a large return. They stood indeed in the condition of partners in the transaction. Soon after engaging in it, however, the war in Nicaragua broke out, and it was discovered that the speculation was a doubtful one.

The cause of the failure is attributed, and no doubt with entire justice, to the failure of Mr. Dutchi, a French commission house, engaged in an extensive mercantile speculation in Guatemala.

Green & Co., however, in order if possible to recover the investment already made, continued to advance money, hoping each day to hear of the discontinuance of the Walker war, and the establishment of peace. But peace was not established, and it becoming evident that the enterprise was a hopeless one, Messre, Green & Co. stopped the supplies at a point which they estimate at two million two hundred thousand francs. Dutchi failed in consequence, and Green & Co. followed.

The most disagreeable feature of this failure is that

sand francs. Duteld failed in consequence, and Green & Co. followed.

The most disagreeable feature of this failure is that all the funds held by this house were placed there by people who are far from home and triends, and in a position where they have no ready access to resources. But it will operate most cruelly on those traveling in distant countries on circular letters obtained from this house, and who will thus suddenly find themselves in distant cities of Europe or the East without money to find their way back as far as Paris.

Green & Co. are confident of being able to resume payments again, and their friends express a strong hope in the same way; but the French law throws so many restrictions around a bankrupt house, that we may well cherish doubts of so desirable a result.

Legend—The mountais forests of Pastoria are inhabited, it is said, by Pixies, Sprites and Elves who, like the Phantom Dancers of Germany, delight to entrap travelers into their realms, and torment them with their mischievous anticathaving the power of transferring the spirit, they often, in their malicious gambols, give life to the newly dead. Statues, rocks and trees are seen fantastically moving in the forest, but it is only during the Day they retain their factitious existence; at the approach of night they resume their immobility.
